Lemon Sharks

In addition to its color, one easy way to identify a lemon shark is by its dorsal fins. In this species, both dorsal fins are triangular in shape and about the same size as each other.

The shark has a short snout and a flattened head that is rich in electroreceptors (ampullae of Lorenzini). Lemon sharks are bulky fish, typically reaching lengths between 2.4 and 3.1 m (7.9 to 10.2 ft) and weights of 90 kg (200 lb). The largest recorded size is 3.4 m (11.3 ft) and 184 kg (405 lb).

Fitness Tips:

Breath Meditation

Breath meditation is both simple and versatile. “There are all sorts of studies that show when you [breathe better](#), you feel better,” says Sherwin. “Your body works better. Slow, deep breaths activate the body’s relaxation response and reduces chronic stress.”

In this type of meditation, you’re focusing on the very act of inhaling and exhaling. “You’re bringing awareness to the natural process of breathing,” she adds. “So it’s giving your mind something to do. You’re following the in breath, and you’re following the out breath.”

Taking deeper breaths can provide many surprising health benefits. “If you’re breathing more deeply, you’re getting much more oxygen to the brain,” Sherwin says. “You’re also releasing much more carbon dioxide on your exhale, which is good for releasing toxins in the body.”

Breathing deeply also has a positive impact on your concentration, creativity and problem-solving skills, she adds. “Something as simple as breathing better can help you in so many ways. It’s profoundly effective.”
